Backend and Android developer with a background in music production and audio engineering. I build APIs and services with Kotlin, Java, and Spring Boot/Ktor, and Android apps with Jetpack Compose. Experienced with Bluetooth LE, audio DSP, and real-time data protocols. A decade managing complex live productions translates directly to shipping reliable software on deadline.

TECHNICAL SKILLS

Kotlin · Java · TypeScript · Spring Boot · Ktor · Jetpack Compose · Svelte · Android SDK · PostgreSQL · Exposed · REST APIs · Bluetooth LE · Clean Architecture · MVVM · Coroutines · Git · Docker

PROJECTS

BLE Testing App

Android app for testing Bluetooth LE and LE Audio devices. Lua scripting engine for custom test sequences, GATT discovery and real-time device communication.

Kotlin · Compose · BLE · LE Audio · Lua · MVVM · Clean Architecture

Wireless Test Platform

REST API for BLE and LE Audio test session management and result storage. Real-time SSE events. Svelte + TypeScript frontend. Containerized with Docker.

Kotlin · Ktor · PostgreSQL · Exposed · SSE · Docker

Audio Watermark

Desktop tool that embeds imperceptible, cryptographically signed watermarks into audio. Survives compression, editing, and format conversion. Real-time spectrogram visualization.

C++20 · JUCE · DSP · CMake
