Backend & Android Developer

Backend and Android developer building APIs, services, and apps with Kotlin, Java, and Spring Boot/Ktor. Hands-on with Bluetooth LE, Jetpack Compose, and full-stack systems. Before tech: 10+ years in the music industry with major artists and complex productions — that's where the habit of solving problems under pressure comes from.

TECHNICAL SKILLS

Languages & Frameworks

Kotlin · Java · Spring Boot · Ktor · Jetpack Compose

Data & Infrastructure

PostgreSQL · SQL · Exposed · REST APIs · Docker

Android & Architecture

Android SDK · Bluetooth LE · Clean Architecture · MVVM · Coroutines · Git

PROJECTS

BLE Testing App

Android app for testing Bluetooth LE devices. Lua scripting engine for custom test sequences, GATT discovery and real-time device communication.

Kotlin · Compose · BLE / GATT · Lua · Clean Arch

Wireless Test Platform
